-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2005.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 9-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 3827166 (Goodman) in view of US 4183157 (Counselman).

Goodman teaches a removable walking sole for a cleated shoe having an outer sole having a rubber bottom layer (18) and a foam upper layer (16) which absorbs indentations caused by the cleats. Goodman lacks the upper being a continuous strip of a stretchable material. Counselman teaches a removable walking sole for a cleated shoe wherein the upper is a continuous strip of a stretchable material. The upper of Counselman is secured along the perimeter of the outer sole by an adhesive. It would have been obvious to provide the walking sole of Goodman with an upper, as taught by Counselman, to provide a more secure attachment to the cleated shoe. Regarding the bottom layer including a "tread", the examiner takes official notice that it is old and conventional in the art to provide the bottom layer of an outer sole with a tread to provide improved traction. Therefore, it would have been obvious to provide the bottom layer of the sole as taught above with a tread.

3. Claims 9-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4183157 (Counselman).

Counselman teaches a removable walking sole for a cleated shoe having an outer sole having a flexible bottom layer (59, the sheet is thin and has a hardness of Type A Durometer value 60-75 and therefore will flex) and an upper first layer (58; see col. 3, lines 24-28 and col. 2, lines 45-56) which absorbs indentations caused by the cleats and an upper having a continuous strip of stretchable material (8). Counselman lacks showing or teaching the bottom layer having a tread. The examiner takes official notice that it is old and conventional in the art to provide the bottom layer of an outer sole with a tread to provide improved traction. Therefore, it would have been obvious to provide the bottom layer of the sole as taught above with a tread. Regarding the upper layer being made out of foam rubber and the bottom layer made out of rubber, it would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the outer sole layers out of foam rubber and rubber as claimed, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

4. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3728

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
